Complete Cyclic Sushkov with a new and homogeneous scheme (all white moves open line to black pieces!): this involves a cycle of threats dual avoidance linked with a cyclic Pseudo-Le Grand AB-BC-CA. • Cyclic Caprice theme: after the first moves, the refutations take white pieces to control respectively the lines d2-c3, b7-c6 and f6-e5. The White keys, tries and real play open cyclically these lines! [A]

In Adabashev system the first pair of variations implements Piatési theme (In the initial position, there are two half-pinned black pieces that are unpinned by the key. However, in two thematic variations, each of them, in defending the threat, moves onto same line with key-piece. When the black King is induced to move onto this line as well, a new pinning-situation arises which White takes advantage of in the mate.[A]
